English

PROFILE

Adaptable software Engineer ready to support operations from conception through post-release support. To seek and maintain full-time position that offers professional challenges utilizing interpersonal skills, excellent time management and problem-solving skills.

WORK EXPERIENCE

Jio Platforms Ltd

Mumbai

Oct 2022 – Current

- ❖ Design, develop, and maintain CI/CD pipelines using Azure devops to automate the deployment in appropriate environments.
- ❖ Collaborate with development teams to integrate automated testing, security checks, and other quality controls into CI/CD pipelines
- ❖ Develop and enhance automation scripts and tools for efficient and reliable deployment of applications and Integrations.
- ❖ Automate the release management process ensuring database changes (using Liquibase) are efficiently deployed to appropriate environments
- ❖ Ensure compliance with security standards and implements of security controls for data protection and user access management and vulnerability management.
- ❖ Strong experience with Bash scripting for Linux.
- ❖ Experience with Liquibase for managing database schema changes, version control, and automating database deployments as part of the CI/CD pipeline.
- ❖ Collaborate with stakeholders to gather requirements, provide technical guidance and provide solutions aligned with business needs.
- ❖ Troubleshoot and resolve issues in deployment pipelines, infrastructure, and application environments on Linux systems.
-

Virtusa Consulting Services Ltd - Engineer

Hyderabad

June 2017 - Oct 2022

- ❖ Proficiency in managing and automating deployments in environments.
- ❖ Strong working knowledge of Microsoft Azure, including services such as Azure App Services, Azure Virtual Machines, and Azure DevOps.
- ❖ Strong experience with Git for source code management, branching strategies, and collaboration.
- ❖ Experience with monitoring and troubleshooting tools across both Windows and Linux environments, including performance monitoring, logs, and telemetry.
- ❖ Familiarity with database management systems (e.g., Oracle SQL, MySQL) and their deployment in environments.
- ❖ Experience with Artifact Repositories such as Nexus, Azure Repo, or GitHub Packages for managing deployment artifacts
- ❖ Knowledge of Agile and DevOps methodologies, with the ability to adapt to a fast-paced development and deployment environment.
- ❖ Document processes, workflows, and configurations for continuous improvement and knowledge sharing, focusing on environments.
-
